

Tutorial 02: HTML Formatting

Boxable supports various HTML tags for rich text formatting.

HTML Code	Description
Bold text	Makes text bold
<i>Italic text</i>	Makes text italic
<u>Underlined text</u>	Underlines text
Strikethrough text	Strikes through text
<i>Bold and Italic</i>	Combines multiple styles
<u>Bold Underlined</u>	Underlined bold text
Heading Tags	
Heading 1	Largest heading
Heading 2	Second-level heading
Heading 3	Third-level heading
Heading 6	Smallest heading
Superscript and Subscript (New!)	
H ₂ O	Water formula with subscript
x ² + y ²	Mathematical exponents
CO ₂	Carbon dioxide formula
E=mc ²	Einstein's equation
A _i ⁿ	Combined super and subscript
Line Breaks and Paragraphs	
First line Second line Third line	Line breaks separate lines
First paragraph Second paragraph	Paragraphs create vertical spacing
Lists	
<ul style="list-style-type: none"> ▪ Item 1 ▪ Item 2 ▪ Item 3 	Unordered (bullet) list
<ol style="list-style-type: none"> 1. First 2. Second 3. Third 	Ordered (numbered) list
Complex Nested Tags	
<i><u>Bold with italic and underline</u></i>	Multiple nested tags work together
<u>Underlined with ^{superscript} and _{subscript}</u>	Combines underline with super/subscripts
